Introduction

Available covered drugs are shown on this 2026 Boeing Drug List. Drugs that are not shown are not covered. Members are encouraged to show this list to their physicians and pharmacists. Physicians are encouraged to prescribe drugs on this list, when right for the member. However, decisions regarding therapy and treatment are always between members and their physician.

Drug List updates – This list is regularly updated as generic drugs become available and changes take place in the pharmaceuticals market. For the most up-to-date information, sign in to **myprime.com**, click on Medicines, then on Find Medicines and enter the name of the drug. You can also call Member Services at the number on your ID card.

How drugs are selected

Drugs on this list are selected based on the recommendations of a committee made up of physicians and pharmacists from throughout the country. The committee reviews drugs regulated by the U.S. Food and Drug Administration.

Both drugs that are newly approved by the FDA as well as those that have been on the market for some time are considered. Drugs are selected based on safety, efficacy, cost and how they compare to other drugs currently on the list. Newly marketed drugs may not be covered until the committee has had an opportunity to evaluate based on these criteria.

How member cost-share is determined

Generally, each prescription drug product is placed into three-member cost-share tiers:

- Tier 1/Generics
- Tier 2/Preferred Brand
- Tier 3/Non-Preferred Drug

See the How to Use this List section for the tier numbers. To verify your cost-share amount for a drug, sign in to **myprime.com**, click on Medicines, then on Find Medicines and enter the name of the drug. You can also call Member Services at the number on your ID card.

Your pharmacy benefit includes coverage for many prescription drugs, although some exclusions may apply. For example, drugs indicated for cosmetic purposes, e.g., Propecia, for hair growth, may not be covered. Drugs that have not received FDA approval may not be covered. Prescription products that have over-the-counter equivalents may not be covered. Drugs that are not FDA-approved for self-administration may depend on your benefit plan coverage.

How to use this list

Covered generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. A reference brand drug is an FDA-approved drug product in which generics are shown to be chemically equivalent. Note: most reference brand drugs (those shown in parentheses) are not covered but provided here for your information. Example: **atorvastatin** (Lipitor) – the brand drug Lipitor is not covered.

Covered brand prescription drugs are shown in all CAPITAL letters followed by the generic name. Example: HUMALOG – Insulin lispro inj 100 unit/ml

- Generics are marked with a “1” and shown in lower-case **boldface** type
- Preferred Brands are marked with a “2” and shown in all CAPITAL letters
- Non-Preferred Drugs are marked with a “3” and shown in all CAPITAL letters
- Specialty Drugs are also marked with an “SP” in the Requirements/Limits column. See the Specialty Drugs section for more information.
- Drugs that are also marked with a “+” indicate specific coverage options. Please call Member Services at the number on your ID card if you have any questions.

Drugs used to treat multiple conditions

Some drugs in the same dosage form may be used to treat more than one medical condition. In these instances, each medication is classified according to its first FDA-approved use. Please check the index if you do not find your medication in the class/condition section that corresponds to your use.

Please note: Drugs that need a health care provider to administer them and are often given to you in a hospital, doctor’s office or other health care setting, may be covered under your medical benefit. Some types of these drugs are contraceptive implants and chemotherapy infusions. If you are taking or are prescribed a drug that is not on this drug list, call Member Services to see if the drug may be covered.

Generic drugs

Using generic drugs, when right for you, can help you save on your out-of-pocket medication costs. Generic drugs must be approved by the FDA just as brand drugs are and must meet the same standards.

There are two types of generic drugs:

- A **generic equivalent** is made with the same active ingredient(s) at the same dosage as the reference brand drug.
- A **generic alternative** is a drug typically used to treat the same condition, but the active ingredient(s) differs from the brand drug.

According to the FDA, compared to its brand counterpart, an FDA-approved generic drug:

- Is chemically the same
- Works just as well in the body
- Is as safe and effective
- Meets the same standards set by the FDA

The main difference between the reference brand drug and the generic equivalent is that the generic often costs much less.

Brand drugs may be removed from or moved to a higher tier on the drug list after a generic equivalent becomes available.

You may be responsible for your member cost-share amount (such as deductible, copay or coinsurance) *plus* the difference in cost between the brand and generic equivalent if you or your doctor requests the reference brand rather than the generic equivalent. Generic drugs generally have the lowest member cost-share amount.

Consider talking to your doctor about generic drugs

If your doctor writes a prescription for a brand drug that does not have a generic equivalent, consider asking if an appropriate generic alternative is available. Only your doctor can determine whether a generic alternative is right for you and must prescribe the medication.

You can also let your pharmacist know that you would like a generic equivalent for a brand drug, whenever one is available. Your pharmacist can usually substitute a generic equivalent for its brand counterpart without a new prescription from your doctor.

Coverage considerations

Boeing's prescription drug plans provide coverage for up to a 30- or 34-day supply of medication (based on your plan), with some exceptions. Your plan also provides coverage for up to a 90-day supply of maintenance medications or specialty drugs. Maintenance medications are those drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol. Some drugs may only be covered for members within a certain age range due to the drug being used for cosmetic purposes or for safety concerns. Drug coverage may be limited to recommendations based on FDA-approved labeling and recognized evidence-based or clinical practice guidelines.

Over-the-counter exclusions: Your benefit plan may not provide coverage for certain prescription medications that have an over-the-counter version.

Repackaged medications: Repackaged versions of medications already available on the market are not covered.

Non FDA-approved drugs: Drugs that have not received FDA approval are not covered.

Prior Authorization (PA): Your benefit plan requires prior authorization for certain drugs. This means that your doctor will need to submit a prior authorization request for coverage of these medications, and the request will need to be approved before the medication may be covered under your plan. For the medications listed in this document, if a prior authorization is commonly required, it will generally be noted next to the medication with a "PA" under the Requirements/Limits column.

Step Therapy (ST): Your benefit plan includes step therapy programs. This means you may need to try another proven, cost-effective medication before coverage may be available for the drug included in the program. Many brand drugs have less-expensive generic or brand alternatives that might be an option for you. For the medications listed in this document, if a step therapy is commonly required, it will generally be noted next to the medication with a "ST" under the Requirements/Limits column.

Dispensing Limits (DL)/ Quantity Limits (QL): Drug dispensing limits help encourage medication use as intended by the FDA. Dispensing limits are placed on medications in certain drug categories. For the medications listed in this document, if a dispensing limit applies, it will generally be noted next to the medication with a "QL" under the Requirements/Limits column. Limits may include: quantity of covered medication per prescription or quantity of covered medication in a given time period. If your doctor prescribes a greater quantity of medication than what the dispensing limit allows, you can still get the medication. However, you may be responsible for the full cost of the prescription beyond what your coverage allows. For a full list of medications and their dispensing limits, sign in to **myprime.com** and click on Forms then on Plan Documents.

*Please note: For certain controlled substance medications, some state laws may not allow coverage by a health benefit plan of such medication if dispensed in a quantity beyond what the dispensing limit allows. You will be responsible for the full cost of the prescription with no benefits applied if the dispensed quantity exceeds the dispensing limit.

ACA Preventive (AC): Medicines marked in the Requirements/Limits column with an "AC", are under the Affordable Care Act (ACA) coverage of preventive services. These products can be filled for \$0 cost under your prescription drug benefit plan.

Remember, medication decisions are between you and your doctor. Only you and your doctor can determine which medication is right for you. Discuss any questions or concerns you have about medications you are taking or are prescribed with your doctor.

Specialty drugs

Specialty drugs are used in the treatment of medical conditions such as hepatitis, hemophilia, multiple sclerosis and rheumatoid arthritis. Specialty drugs may be oral, topical or injectable medications that can either be self-administered or administered by a health care professional. Coverage for medications administered by a health care professional may depend on your benefit plan.

Drugs that are considered a specialty medication are marked with an “SP” under the Requirements/Limits column on this list. You can also sign in to **myprime.com**, click on Medicines, then on Find Medicine and enter the name of the drug. If the drug is a specialty medicine, it will be noted as such under the Additional Requirements section. If you have questions about your coverage for specialty medications or your prescription drug benefit, call the Member Services number on your ID card.
